Art Unit: 1614

Claims 1 and 2 are drawn to an enhanced combination of a plasma-soluble metal salt of ascorbic acid and one or more Vitamin C metabolites. Applicant is, therefore, required to elect a single enhanced combination of one plasma-soluble metal salt of ascorbic acid with one Vitamin C metabolite for examination on the merits.

The several inventions above are independent and distinct, each from the other, as they have acquired a separate status in the art of treating as a separate subject matter for inventive effect and require independent searches. It is noted that a reference to one enhanced combination of drugs would not be a reference to another enhanced combination of drugs under 35 U.S.C. 103. Further, the claims read on a multitude of enhanced combinations of drugs which would require many field of searches that would be an undue burden on the Examiner. Therefore, restriction for examination purposes is proper.

Applicants is required to make a provisional election even though this requirement is traversed.
